FK 700

PROFESSIONAL FRONT BRUSH CUTTER

The **FK 700** is a professional front brush cutter, designed for high performance, maximum comfort, great cutting efficiency, and low fuel consumption.

The **front flail mower** allows full visibility of the working area, prevents the cutting area from being pressed and facilitates cutting under low branches and bushes!

The **floating cutting attachment** ensures a perfect result even on undulating terrain. The **pivoting rear axle** and tractor-profiled front wheels provide a precise finish over bumps and hollows.

The cutting height is **mechanically adjustable** from a minimum of 0 cm to a maximum of 10 cm. Adjustment is **quick and easy** without using spacers.

A smooth and progressive **single lever** controls **forward and reverse** speed from 0 to 15 km/h in fast gear and from 0 to 8 km/h in slow gear. The lever offers maximum control and ease of use when driving while cutting as well as during transfers.

The disc **parking brake** is conveniently activated with a hand lever from the driver's seat.

The **compact dimensions, 37 cm turning radius** and front cutting attachment make the FK 700 ideal for areas with obstacles or narrow spaces.
